

OASIS® PATIO SHADES

and Retractable Insect Screens by Insolroll

Making Outdoor Living More Comfortable

Block the Sun, Not the View

What Makes Oasis Patio Shades Better?

Teardrop-Shaped Hem Bar

inside fabric pocket reduces stress on fabric created by other systems using exposed hem bar.

Durable Side Track System

with metal hem bar insert and side track rail guard eliminates insert breakage.

Cable Guide System

with UV-coated cable reduces stress on nylon cable guides. Competitors often use non-coated cables which can have a sawing effect on cable guides.

Welded Fabric Edges

minimize fabric fraying and enhance fabric durability.

Oasis Patio Shades Provide Outdoor Protection

Glare Protection

Our solar screen fabrics block up to 99% of the sun's visible light, reducing glare. Darker fabrics provide the best glare reduction and the best view-through.

Heat Protection

Reduce heat on the patio with shade on-demand. Lighter-colored fabrics reflect the heat. Darker colors absorb the heat and are very effective on a well-ventilated patio.

UV & Weather Protection

Protect your furnishings with high quality solar screen and water-resistant fabrics.

Golf Ball Protection

Protect your windows and patio area on homes facing the golf course.

Oasis 2700 Compact Patio Shades

For smaller patios and outdoor openings up to 12' wide

4" x 4½" extruded
aluminum
Head Box

Motorized or
manual crank and
gear operation

The Insolroll Story

A pioneer in the patio shade industry, Insolroll built its first outdoor shade in 1986, with a mission to block patio sun glare and make outdoor dining cooler and more comfortable. Solar screen fabric allowed us to block the sun but not the view.

Insolroll's innovation and engineering have resulted in a durable range of patio shade models providing glare, heat, UV, insect protection, and even golf ball protection. All Insolroll shades are made in Colorado.
